Andover High School, Andover, MA   Sept. 2012 - June 2016
Related Courses: Advanced Placement (AP) Computer Science, Advanced Placement (AP) Calculus

Computer Knowledge

Languages: Java, SQL, C++, JavaScript, Swift, C#, Python, R
Databases: MySQL, SQLite, SQL Server, Amazon RDS

Work Experience

MFS Investment Management, Boston, MA   Jan. 2019 - July 2019
Software Development Co-op
- Created data visualization application using Java and MySQL that allows investment traders to easily access information from the CRIMS trading software, used by hundreds of traders in different offices
- Wrote Selenium automated test scripts to ensure functionality between MFS proprietary software and updated versions of trading software from vendors
- Implemented bug fixes in MFS proprietary programs and managed documentation in JIRA

EndGameTV, Seattle, WA   May 2017 - Sept. 2017
Professional Gamer
- Competed in tournaments in four countries as lead sponsored player on a professional gaming team for the video game Super Smash Bros Melee
- Ranked #12 worldwide and individually recognized in articles by ESPN, Red Bull, Twitch, and HTC

Game Assembly, Manchester, NH   Summers 2015, 2016
Software QA Intern
- Created Unity mobile racing game with pathfinding AI written in C# that scales with skill level of user
- Tested code and visual environment for mobile games to contribute to team repository of bugs and fixes

Projects

Low Latency Live Piano | *Creator*   June 2019 - Present
- Developed live piano program in C++ using SDL library for responsive graphics and audio output
- Programmed buffer size and sampling rate of audio output to optimize for lowest possible latency
- Measured live audio latency to be 4x faster than professional live piano programs such as AbletonLive

Global Terrorism Database | *Creator*   June 2018 - Sept. 2018
- Created conceptual and logical modeling in MySQL to represent 25 attributes of over 170,000 terrorism incidents around the world from 1970-2015
- Wrote Java API and utilized JDBC to connect Java code to MySQL database
- Designed and developed web interface using R and Shiny, hosted online with Amazon RDS
